Page 1

This is one of three (#1852, #1860, #1868) nearly identical structures (each 2000 square feet) built for \$3200 each in 1943 on the south side of Base Street (A Street). All three buildings are "Theatre of Operations," "Temporary," "OBAT," from plan 700-5201.

Buildings 1852, 1860 and 1868 have 20 feet by 100 feet plans with the long sides facing north and south. They have concrete foundations and floors, wood frame walls covered with tarpaper roll siding and gabled roofs with asphalt roll roofing. The tarpaper is secured with wooden battens, giving the exterior walls a checkerboard appearance. Because of the fragile nature of the tarpaper, it has come off in many areas, exposing the wood sheathing behind it. The buildings have several roof vents plus louvered vents in the gable ends. The windows have 9 panes in square bays while the doors are of wood and glass panel type.

The interiors of these three buildings consist of a long, narrow central room with small rooms only on the two ends of the plan. Interior elements include restrooms, a water cooler, space heaters and incandescent lights. The buildings appear to be quite neglected in their maintenance, but otherwise sound structurally.
